Summary

Full-Stack & AI Developer specializing in the MERN stack, autonomous multi-agent systems, and scalable backend microservices. Proven expertise in orchestrating LLM workflows with LangGraph and LangChain, optimizing real-time systems using Redis and WebRTC, and containerizing distributed applications with Docker and AWS.

Technical Skills

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, Data Structures and Algorithms

Frontend: React.js, Redux Toolkit, Context API, Tailwind CSS, Vite, Axios, Recharts

Backend & Microservices: Node.js, Express.js, Microservices Architecture, RESTful APIs, JWT, RBAC, Firebase Auth

AI & LLM Frameworks: LangGraph, LangChain, Google Gemini API, Prompt Engineering, Multi-Agent Systems

Databases & DevOps: MongoDB, Mongoose, Redis, Docker, AWS (EC2/S3), Git, GitHub, Postman, Vercel/Render

Projects

AI Interviewer | [Demo Link](#) [Github Link](#)

- **Architected an Autonomous Multi-Agent System:** Designed and orchestrated 4 specialized LLM agents (Mock Interviewer, Resume Analyzer, Feedback Evaluator, Roadmap Generator) using **LangChain**, **LangGraph**, and **Google Gemini API** with cyclic graph workflows and structured JSON output.
- **Built Scalable Microservices Architecture:** Decoupled platform capabilities into independent **Node.js/Express** microservices, containerized using **Docker** to streamline orchestration and cloud deployment on **AWS**.
- **Optimized Latency & State Management:** Integrated **Redis** caching for dynamic conversational states, context windows, and templates, reducing LLM token overhead and cutting API latency by **40%**.
- **Tech Stack:** React.js, Node.js, Express.js, LangGraph, LangChain, Google Gemini API, MongoDB, Redis, Docker, Firebase, AWS

Loom | [Demo Link](#) [Github Link](#)

- Architected 12+ secure RESTful Express endpoints, **enforcing JWT authentication with rotating refresh tokens stored in HTTP-only cookies and custom RBAC middleware to prevent XSS and unauthorized access.**
- Integrated Stream API and WebRTC for real-time video/chat, **optimizing media track constraints and leveraging regional edge signaling nodes to reduce glass-to-glass latency by 20%.**
- Engineered a responsive frontend architecture featuring 4 core protected client-side routes, robust user authentication flows, dynamic notification systems, and cross-device layouts.
- **Tech Stack:** React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, REST API, JWT, Stream API, WebRTC

Zomasta | [Demo Link](#) [Github Link](#)

- Architected a full-stack food delivery application featuring end-to-end user workflows, seamlessly managing 30+ persistent application states across restaurant discovery, cart interaction, and checkout.
- Designed a secure, role-based backend architecture with decoupled User and Food Partner modules utilizing 8+ custom Mongoose data schemas.
- Implemented an intuitive partner dashboard with a live order-tracking system, enabling real-time status updates via optimized client state and efficient HTTP polling intervals set to 5-second cycles.
- **Tech Stack:** React.js, Vite, CSS, Node.js, Express.js, MongoDB, REST API, Git, GitHub

Education

Kanpur Institute Of Higher Education

Bachelor's of Computer Applications

Aug. 2021 – June 2024

Kanpur, U.P

AccioJob

Gen AI with MERN Stack Training

July 2025 – Present

Remote, India

Certifications and Achievements

Top 10 Hackathon Finalist (Rank 10 / 100) | Certificate

- Secured 10th rank out of 100+ participating teams by designing and deploying a functional full-stack MVP within an intensive time constraint.

JavaScript Mastery With Scaler | Certificate

- Mastered core and advanced JavaScript concepts by completing an intensive curriculum spanning 9 technical modules, 70 video tutorials, and 8 practical engineering challenges.

Developer and Technology Job Simulation – Accenture (Forage) | Certificate

- Completed practical tasks covering the Software Development Lifecycle (SDLC), Agile & Waterfall methodologies, STLC, algorithmic thinking, and code debugging.
